# Chapter 1 App Instruction

## 1.1 Application Environment

FreeIP can run in phone, pad, PC, includes android and IOS systems. User can connect IPC, DVR, NVR, XVR and fisheye camera by phone and PC client. The connection between client and IPC, DVR, NVR, XVR and fisheye camera as shown in figure 2-1. FreeIP App is used for phone or pad; web is used for windows PC.

### Instruction

- App supports phone and pad that with or over Android 4.4 version.
- App supports iphone and ipad that with or over IOS 9.0 version.
- Supports medium and high resolution Android phones such as 800\*480, 1280\*720, 1920\*1080.
- Supports 1280\*800, 1024\*768, 2560\*1600, 2048\*1536 and other high-resolution 7-inch to 10-inch tablet computers.
- Old version FREEIP can be replaced directly when install new version.
- Support Simplified Chinese, Traditional Chinese, English, Arabic, Czech, German, Greek, French, Hungarian, Polish, Portuguese, Russian, Thai and many other languages.
- This instruction introduces android, IOS system of phone and pad, ipad App. All current and old apps would have difference in icon and layout, please subject to the actual App you use.

## Chapter 2 Deployment Diagram of System Structure

Deployment Diagram between devices and phone, pad client as shown in Figure 2-1;

Figure 2-1

## Chapter 3 App Function

### 3.1 Download and Installation

**FreeIP Service Procedure:** register-->Log in-->Devices Added--> Service Application

It is downloaded and installed on Apple's mobile phone, Android mobile phone, tablet PC, and PC using the following methods.

(1) Scan the image below for the QR code.

Figure3-1 Android Phone Download      iOS phone download

Figure 3-2 Android Pad Download      iPad Download

(2) log in “FreeIP” official website <http://www.freeip.com>; or Android users go to Google play to download and install, iOS users directly in the App Store search for "FreeIP" to download and install.

(3) Phone or pad client enter the following URL to download and install.

Download address for Android phone:

<https://play.google.com/store/apps/details?id=com.xc.hdscreen>

Download address for IOS phone:

<https://itunes.apple.com/cn/app/freeip/id898690336?mt=8>

Download address for Android Pad:

<https://play.google.com/store/apps/details?id=com.freeip.hd.ui>

Download address for ipad:

<https://itunes.apple.com/cn/app/FREEIP%20HD/id981358027?mt=8>

## 3.2 Login Interface

The login interface consists of the account password, the forgotten password, registration, and other methods. The login screen as shown in Figure 3-3.

①

Figure 3-3

### 3.2.1 Enter the login screen

Enter the login screen as shown in Figure 3-4.

①

②

③

Figure 3-4

- ① Run "FreeIP" on the phone or pad, click "  " in the upper left corner of the preview interface to enter the sliding menu bar;
- ② Click "  " above the interface to enter the "More" interface;
- ③ Click "  " above the interface to enter the "Login" interface.

### 3.2.2 Register FreeIP Account

New users need to register an account to log in, as shown in Figure 3-5 below:

①

②

Figure 3-5

- ① Open App, enter the login screen, click "Register";
- ② Enter the email address, password, confirms password, and verification code, and click "Confirm".

#### Instruction

- FREEIP and FreeIP Pro Account that already registered can log in directly.
- The e-mail address used for registration must be valid and can be used to check e-mails in order to forget the password.

### 3.2.3 Forget password

When you forgot password, you can reset it. Reset the password as shown in Figure 3-6.

①

②

③

Figure 3-6

- ① Open App, enter the login screen, click "Forget";
- ② Enter the email account and click "Next".
- ③ Enter the new password, confirm the password, log in to the registered email to find the verification code, enter the "Please enter captcha" column, and click “Complete” .

#### Instruction

- Reset password, account when registering must be entered and the account must be valid email, can log in and receive email.

### 3.2.4 Log in

Account login FreeIP as shown in Figure 3-7:

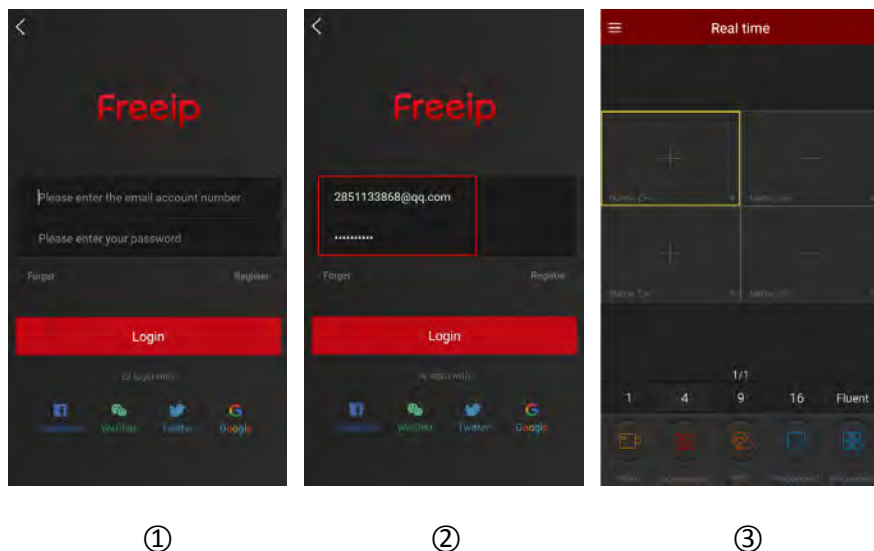

Figure 3-7

- ① Open App, enter the login screen;
- ② Enter the account number and password, click "Login" to enter the "Real time" interface;
- ③ Click " " in the upper left corner to return to the sliding menu bar interface.

#### Instruction

- At the same time support Facebook, WeChat, Twitter, Google third-party account login.

### 3.3 Menu Introduction

①

②

③

Figure 3-16

- Add a device with SN, AP mode, Wifi Model, LAN Search and IP/DDNS (direct add) and other methods.
- AP mode and Wifi mode are used to add configurable WiFi devices, following the App prompt steps to configure the device. Connect the device to WiFi and add it to that account finally.
- LAN search can support shake, follow the App tips steps to search and add LAN internal device.
- The IP / DDNS mode allows you to directly enter the device information and add a direct-attached device for the account. (After you add a direct-attached device, the Direct-attached Device group appears in the device management).

### 3.6.2 Devices details

The device details interface can view information such as the device serial number, online status, and device sharing quantity. You can edit device names, switch groups, share devices, open/close motion detection alarms, cloud recording, cloud service settings, and delete devices.

#### ■ Enter the device details interface

Enter the device details interface as shown in Figure 3-17 ① ② ③.

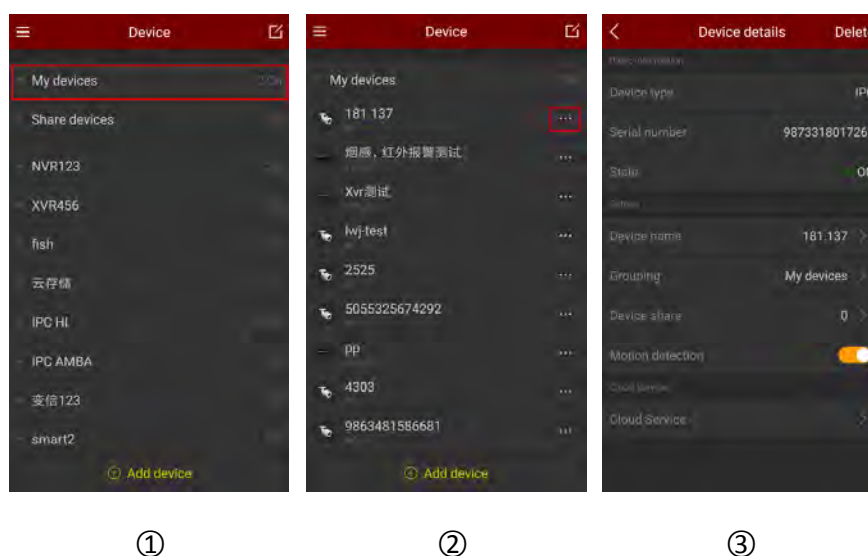

Figure 3-13

① In the sliding menu, click "Device", select the group where you want to edit the device;

② Click "..." next to the device to enter the device details screen.

#### Instruction

- The cloud recording and cloud service features are only available for devices that support H.264+ or H.265+.

### ■ Modify the device name

In the device details interface, click "Device Name" → Modify Device Name → click "Confirm".

Modify the device name as shown in Figure 3-18 ①.

### ■ Modify the device group

On the Device Details screen, click "Grouping" → select the group → click "Confirm"; you can also add a new group at this interface, divide the device into the new group, as shown in Figure 3-18

②. The methods of adding group please check Adding Group content.

### ■ Delete device

In the device details interface, click "Delete" → click "Confirm", as shown in Figure 3-18 ③.

Figure 3-18

### ■ Share Device

In the device details interface, click "Device share" → Please share account scan QR code to add device → device use member interface to display share account, as shown in Figure 3-19 ① ②.

### ■ Delete Sharing

In the device details interface, click "Device share" → click " " → choose to delete account → click "Delete" as shown in Figure 3-19 ② ③.

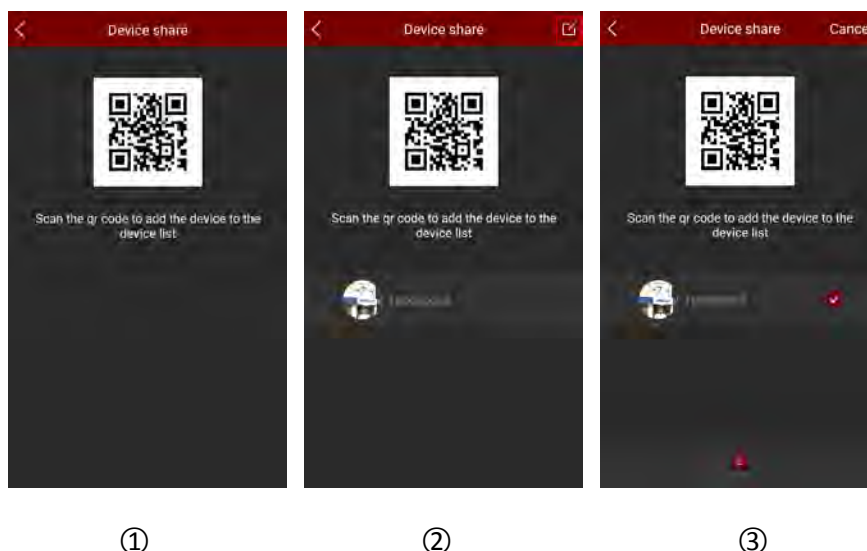

Figure 3-19

### ■ Set motion detection alarm

If the device supports motion detection alarm, the motion detection alarm status switch will appear in the device details interface, which can turn on or off the motion detection alarm of the device, as shown in Figure 3-20 ①.

### ■ Cloud video

If the device supports and has purchased the cloud storage service, you can click to enter the cloud recording on the device details page to view the device's cloud storage video, as shown in Figure 3-20 ②.

### ■ Cloud Service

If the device supports H.264 + or H.265 +, you can click to enter the cloud service and purchase the corresponding cloud service package to realize the cloud storage in the device details interface, as shown in Figure 3-20 ③.

Figure 3-20

#### Instruction

- In the list of devices, press and hold the device name to drag up and down, and toggle the device in the order.
- The device has been shared with others can only in sharing device group, can not switch to other groups.
- When you delete this device in the shared account, the shared account device disappears at the same time.
- The shared device can be deleted by sharing account and accepting share account as well.
- Cloud storage devices need to support H.264 + or H.265 +, and the encoding is set to H.264 + or H.265 +.
- Currently supports Amazon cloud storage.

### 3.6.3 Group management

The device group list supports adding groups, editing groups, and deleting groups.

#### ■ Adding group

Adding group as shown in Figure 3-21;

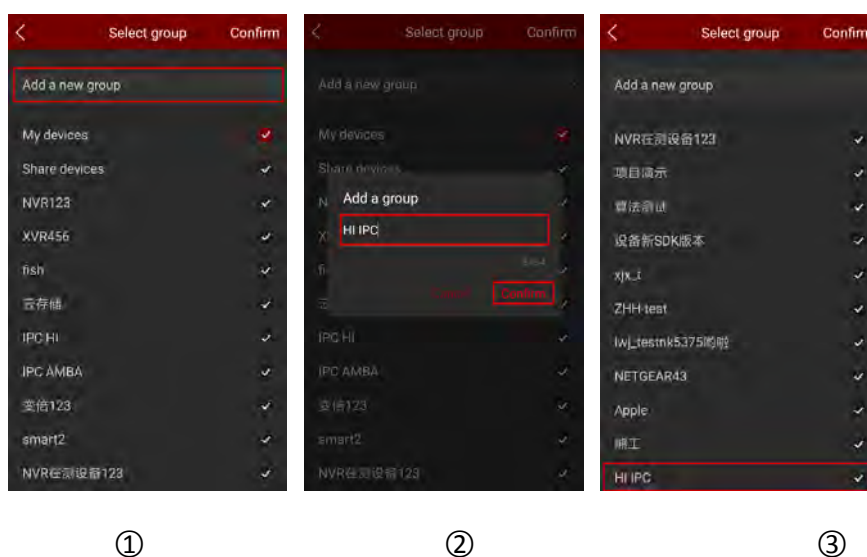

Figure 3-21

① In the device management interface, select the group where you want to edit the device →

click "⋮" next to the device → click "Grouping" → click "Add a new group";

② Input the group name, click "Confirm";

③ New added group displayed in group list.

## ■ Editing group name

Editing group name as shown in Figure 3-22;

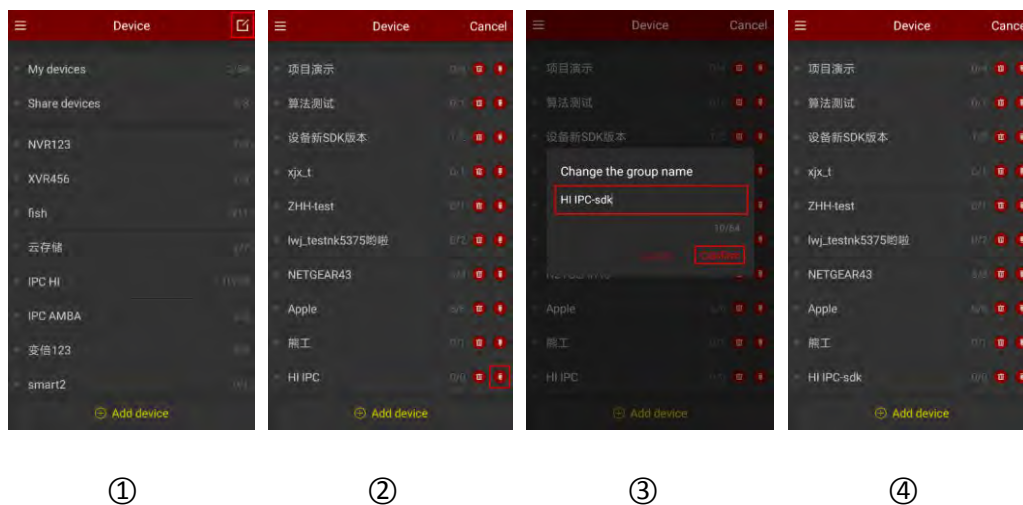

Figure 3-22

- ① In the Device interface, click the " " button;
- ② Click the " " button;
- ③ Input the new group name, click "Confirm";
- ④ New group name displayed in device management list.

## ■ Delete group

Delete group as shown in Figure 3-23;

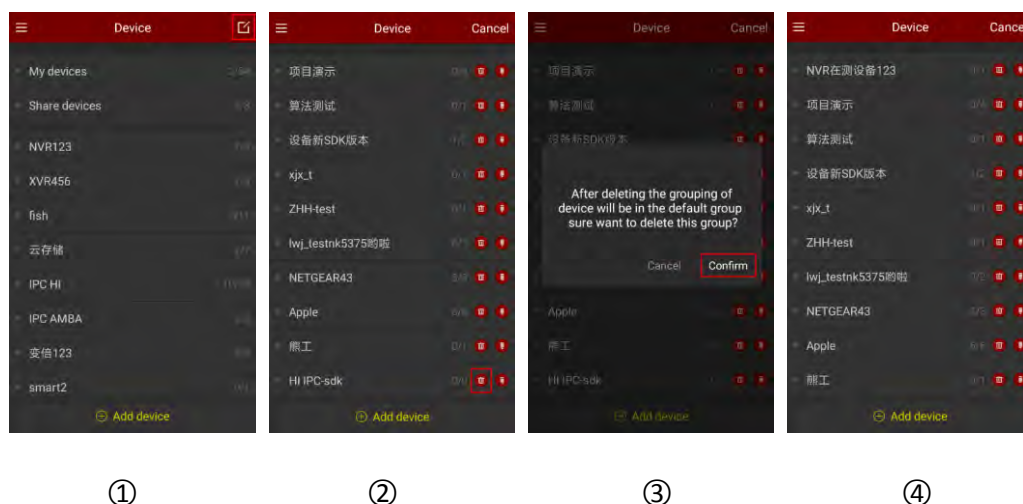

Figure 3-23

- ① In the Device interface, click the " " button; ""

- ② Click the " " button;
- ③ Click "Confirm";
- ④ The group is deleted from the device group list.

#### Instruction

- When a group is deleted, all devices in this deleted group will be placed in the default group.
- In the device list, default group "My device" and "Share device" can not be edited and deleted.

## 3.7 Direct connection (Pad)

FreeIP direct connection function is used to connect directly to the port mapping device, you can add, edit, delete the device, real-time play the add device video; Currently only the Pad version has a separate direct interface.

### 3.7.1 Direct play interface

Direct connection supports 1 / 4 channels real-time streaming playing, the default mode is 4 channels playing, as shown in Picture 3-24 ①; in the real-time preview interface, click "+" of the play window , enter the device list, select the preview Device, click "Preview" as shown in Figure 3-24 ②;

①

②

Figure 3-24

The bottom toolbar has more functions, as shown in the following Table 3-3:

Pad/iPad	Description
	Start / stop recording

	Screenshot
	Close all channel video
	Toggle playing window
	Close the current channel
Fluent/ BD / HD	Definition (stream) switch

Table 3-3

### 3.7.2 Add direct devices

Add direct devices as shown in Figure 3-25:

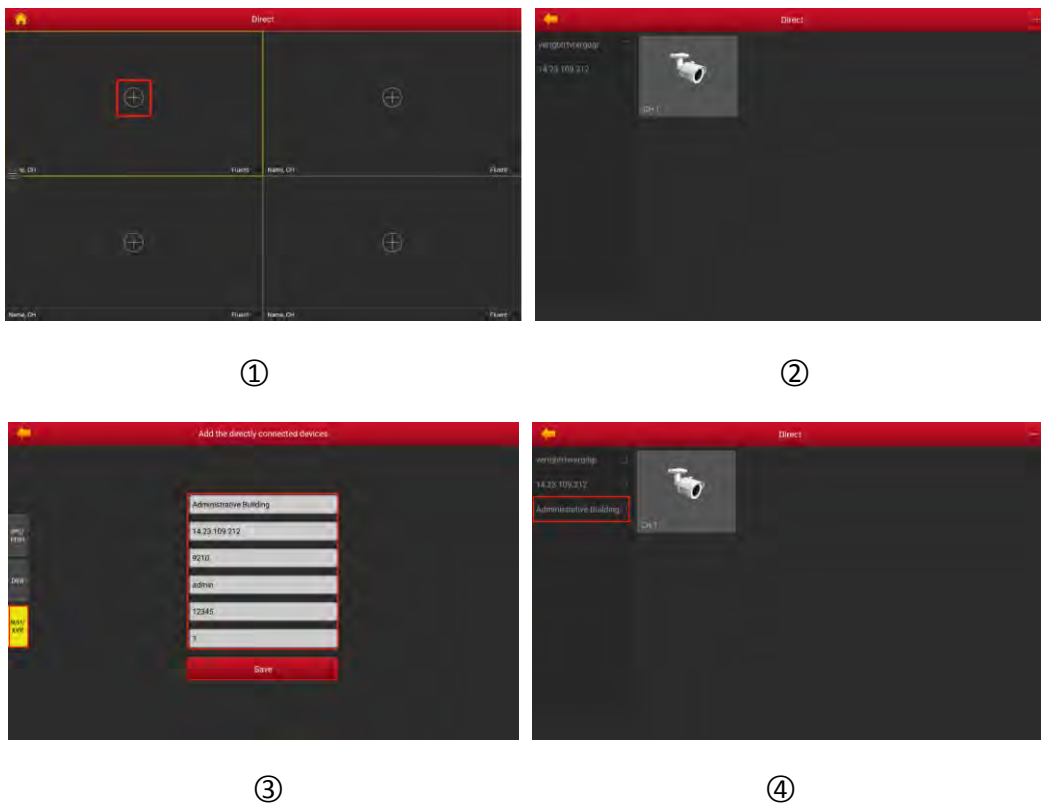

Figure 3-25

- ① In the direct preview interface, click devices of play window "+";
- ② click "+" button at the upper right corner of the interface;

③ Enter the adding device direct connection interface and select the type(IPC/Fish、DVR、X/N/HVR) of device you want to add , input the device name, IP, address, port, user name, password and channel quantities, click "Save" to complete adding device.

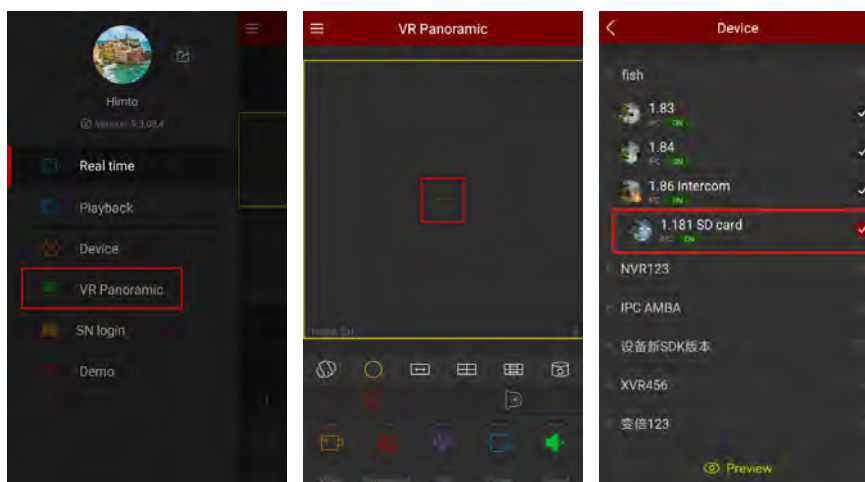

#### Instruction

- Address: The device maps out of the extranet address use the domain name also available.

		operation.
		Shut down current channels
		Shut down all channels
	/	Enter playback interface
1/4/9/16		Switch preview windows
BD/HD	BD / HD	Definition (stream) switch
		Timeline, the recording information of current device searched. During playback, it's available to playback by dragging to whenever it is on timeline; the default start time is 0:00:00 of the current day.
		Calendar, it's for selecting playback date.

Table 3-5

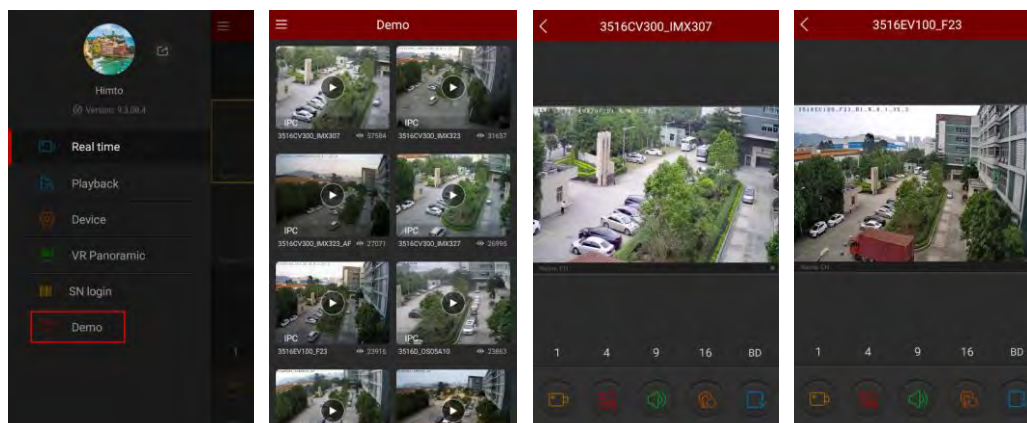

#### Instruction

- Only when devices support recording and there is video, can enter playback interface by clicking " " button.
- After single-channel device serial number is registered, the default single-screen preview is real-time video; it is the default playback device ch1-ch4 after 4 or more channel devices are registered. 4-screen preview real-time video can close the video, click "+" to switch preview other channel video.
- Logging in with serial number, device has to be online, serial number, account and password have to be correct.
- Click " " in the upper right corner to switch other time recordings as shown in Figure 3-27 ⑤.
- Click the preview window "+" to enter the device list and select the playback channel as show in Figure 3-27 ⑥.

### 3.10 Demo

Demo interface is used to show the video of our company representative devices. View those Demo videos as shown in Figure 3-28:

①

②

③-1

③-2

Figure 3-28

- ① Select "Experience" on main menu or menu sliding bar to enter Experience interface.
- ② Select the video to preview the device in the Experience interface.
- ③ The experience interface starts to play the video. The video preview of general camera is shown as ③-1, ③-2.

#### Instruction

- All the icons on experience preview interface are the same with those on real-time preview, but the former actually support only streams switching, video shutting down and reconnecting and some other functions are invalid.
- Available to view the demo without accounts to log in.

### 3.11 MORE

Click the account icon in the sliding menu bar to enter more interfaces as shown in Figure 3-29

- ①. The more interfaces are composed of personal information, image, event messages, cloud device, download, and setting as shown in Figure 3-29 ②.

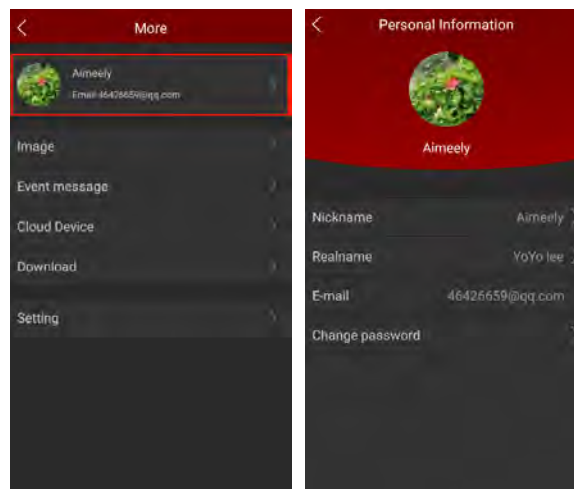

①

②

Figure 3-29

### 3.11.1 Personal information

On the "More" interface, click on "User Avatar" to enter the personal information interface (as shown in the following figure 3-30 ① ②). The user information is used to view the current login account's avatar, nickname, real name, email address, and change password. The avatar, nickname, real name, and change password are editable.

①

②

Figure 3-30

#### ■ Change avatar

Change avatar as shown in Figure 3-31:

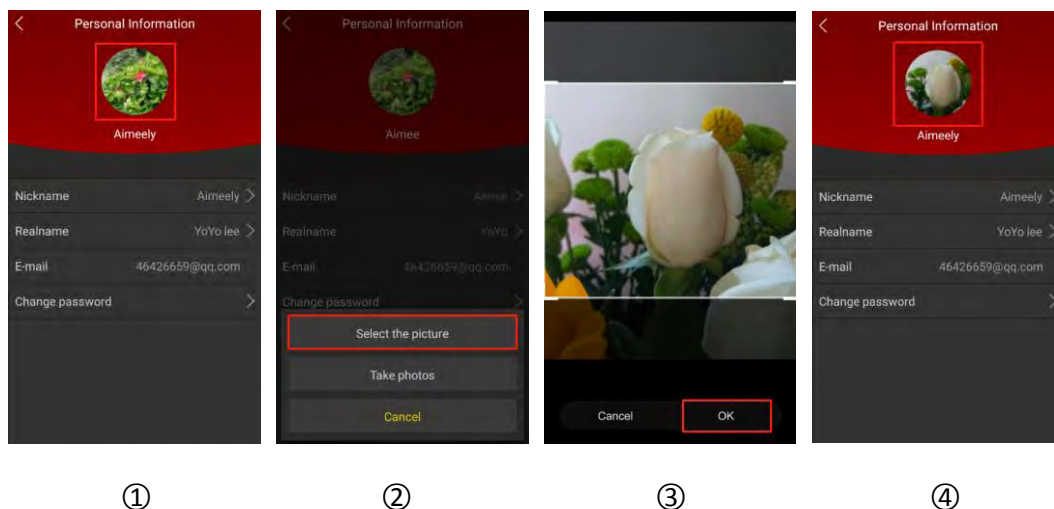

Figure 3-31

- ① Click the "User Avatar" in the personal information.
- ② Enter the mobile photo album to select the picture of the avatar or use a mobile phone to take a photo.
- ③ Adjust the position and size of the picture on the picture and click "OK".
- ④ The personal information interface displays the updated avatar.

#### ■ Edit nickname

Edit nickname as shown in Figure 3-32:

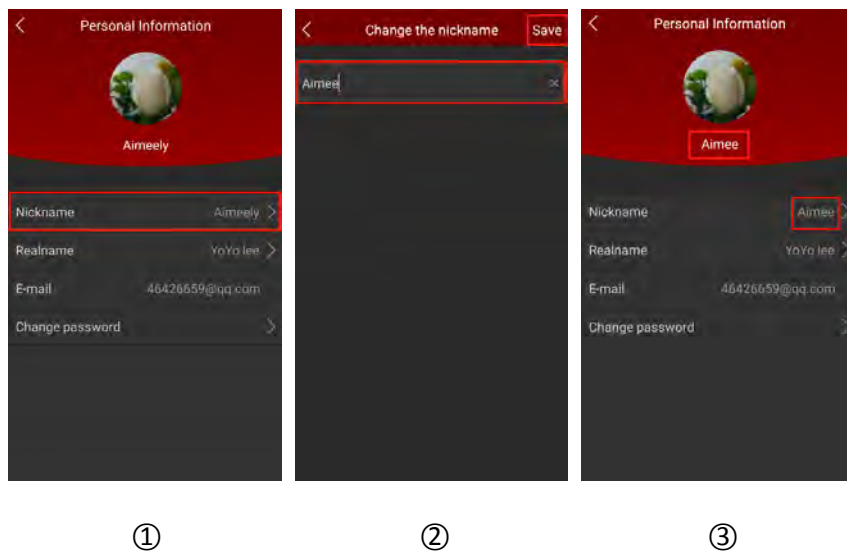

Figure 3-32

- ① Click the "Nickname" in the personal information.
- ② Click the edit box, modify the nickname, and click "Save".

③ The personal information interface displays the updated nickname.

#### ■ Edit real name

Edit real name as shown in Figure 3-33:

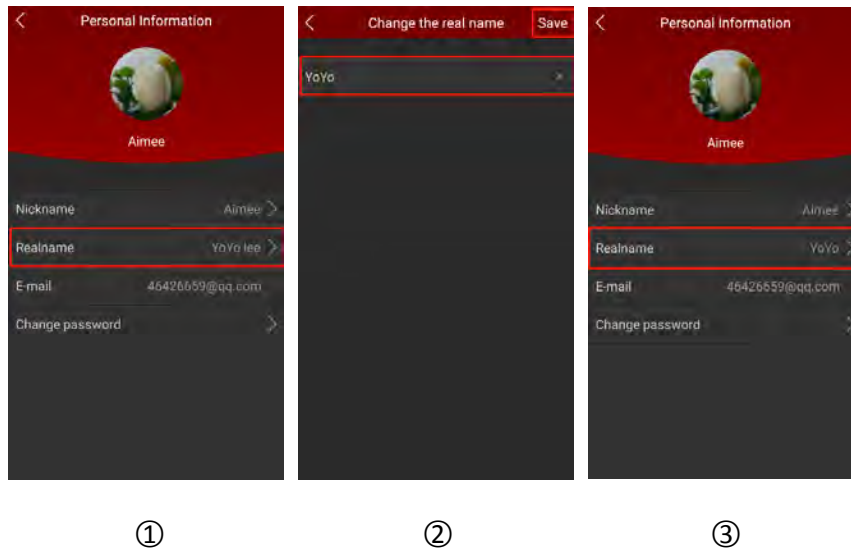

Figure 3-33

① Click the "Realname" in the personal information.

② Click the edit box, enter the real name, and click "Save".

③ The personal information interface displays the updated real name.

#### ■ Change password

Change the account password as shown in Figure 3-34:

Figure 3-34

① Click the "Change password" in the personal information.

- ② Enter the old password, new password, confirm password, and click "Save".

#### Instruction

- Have to input correct old one when changing password, otherwise it will fail.
- After successfully changing the password, the App automatically jumps to the login screen and enters the new password to log in.

### 3.11.2 Image

Image is used to View and Edit local screenshots and videos of APP Clients, including Preview, Playback, Direct and VR Panoramic.

#### ■ Local Screenshots Viewing

View the local screenshots as shown in Figure 3-35:

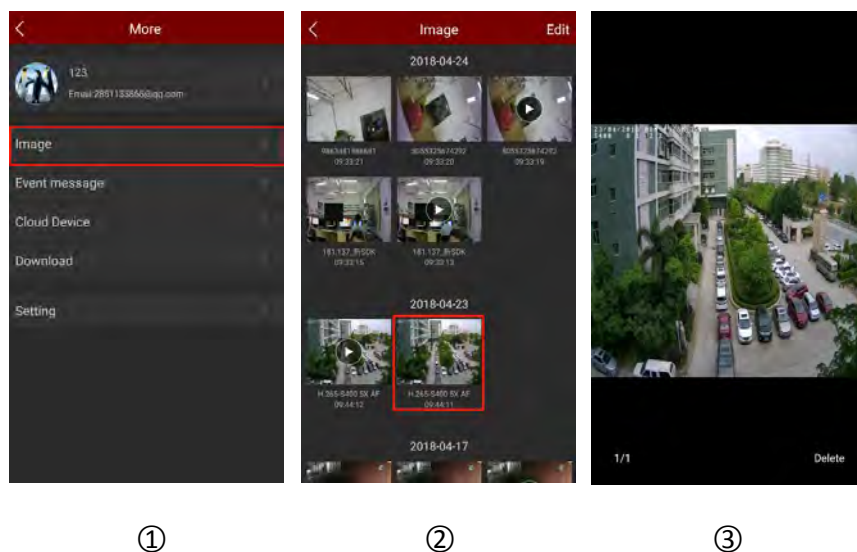

Figure 3-35

- ① Click the account icon in the sliding menu bar→Select "Image";
- ② Click on the picture you want to preview;
- ③ Full screen shows the picture.

#### Instruction

- When viewing pictures on a single screen, the delete button is in the lower right corner of the screen. Click to delete the current picture.
- When viewing a picture on a single screen, click in the middle of the picture to return to the image management interface.
- When viewing a picture on a single screen, you can switch the picture by swiping left and right.
- When viewing a picture on a single screen, the electronically magnified picture can be separated and merged with the thumb and forefinger.

## ■ Local Videos Viewing

View the local videos as shown in Figure 3-36:

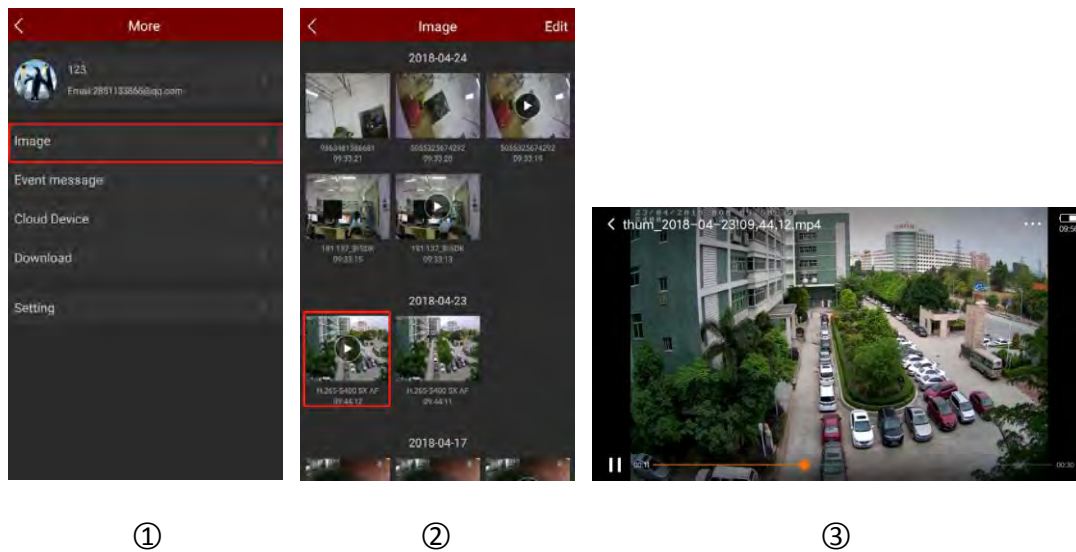

Figure 3-36

- ① Click the account icon in the sliding menu bar→Select "Image";
- ② Click on the video you want to preview;
- ③ Select the mobile player to play the video.

### Instruction

- When viewing the video, the “<” in the upper left corner of the screen is the return button. Click to manage the image.
- When the interface automatically plays videos, set the phone's own player to "pause/play", "fast forward", "fast back", "drag progress bar", and "back" to stop playback and drag the volume progress Adjust the volume. Because each mobile phone comes with a different player, there are differences in the keys when playing video.

## ■ Delete Image in all contents

Delete Image in all contents as shown in Figure 3-37:

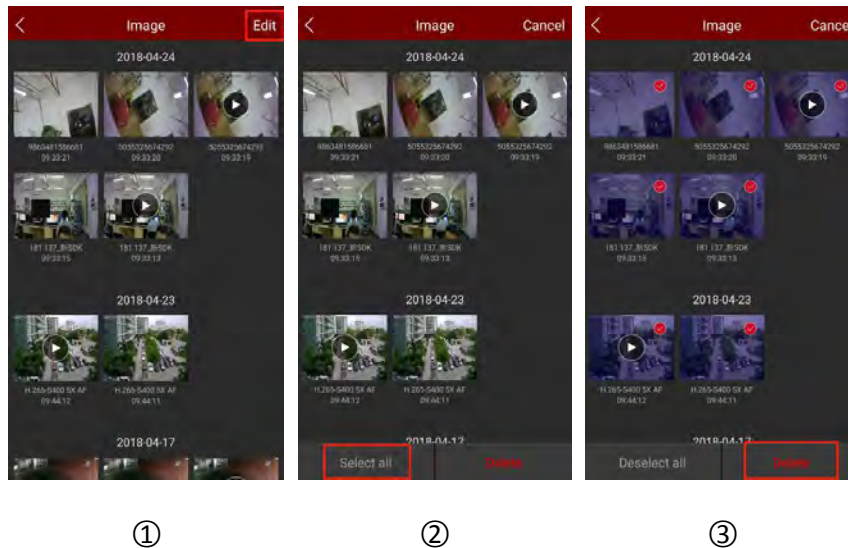

Figure 3-37

- ① In the Image interface, click the "Edit" button in the upper right corner;
- ② Click the "Select all" button in the lower left corner;
- ③ Click the "Delete" button in the lower right corner.

#### ■ Delete selected picture or video

Delete selected picture or video as shown in Figure 3-38:

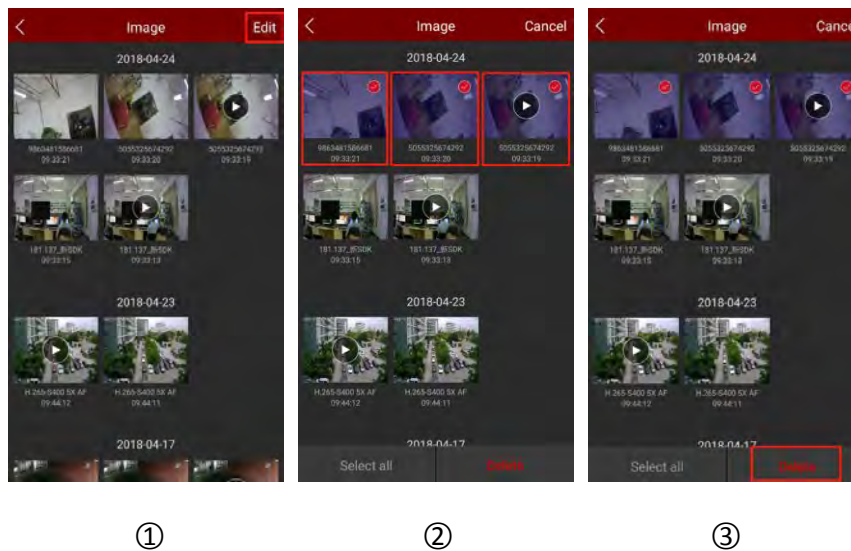

Figure 3-38

- ① In the Image interface, click the "Edit" button in the upper right corner;
- ② Click to delete the video or picture;
- ③ Click the "Delete" button in the lower right corner.

### 3.11.3 Event message

The event message is used to view the alarm messages pushed by the device and view the alarm event details of the device.

#### ■ Check the event message

Check the event message as shown in Figure 3-39.

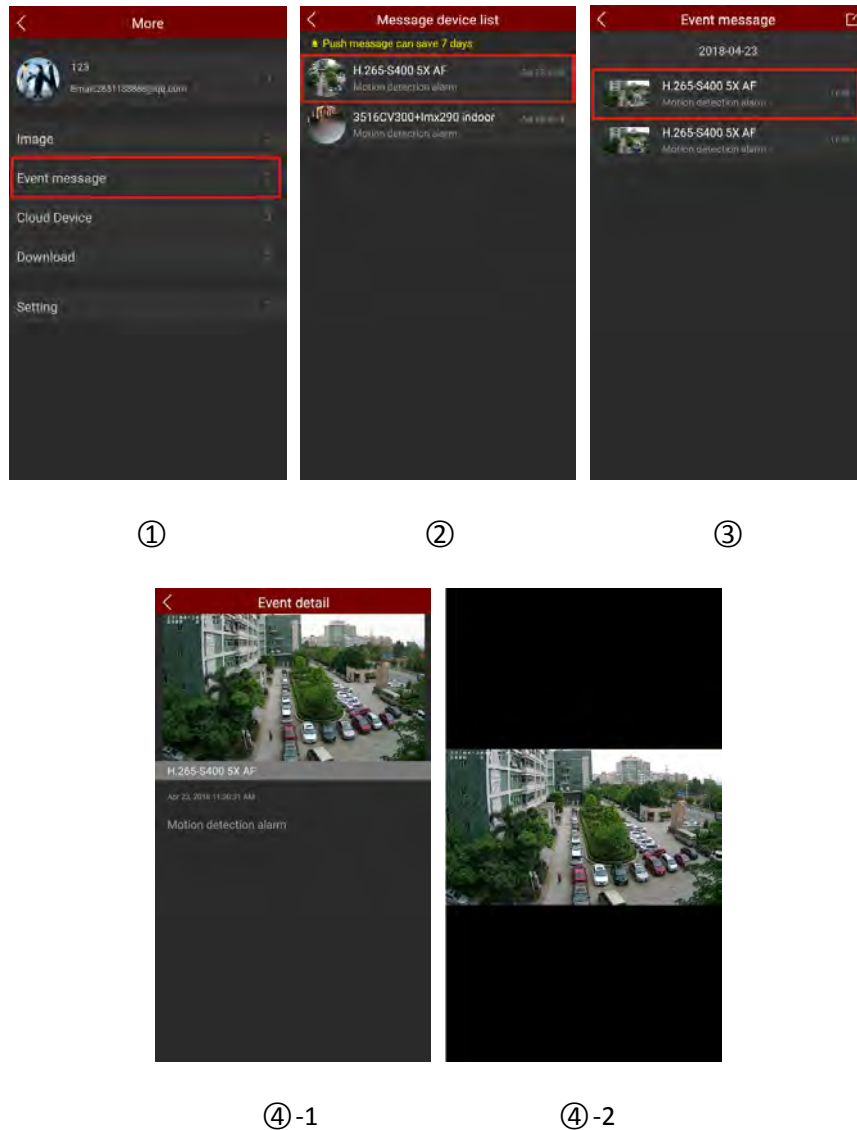

Figure 3-39

- ① Click the account icon in the sliding menu bar→Select "Event message";
- ② Select the need to see the alarm device;
- ③ Select the alarm message according to the time of the event;
- ④ To view the details of the message event, click on the picture to view the alarm picture.

### Instruction

## Chapter 4 FAQ

### **Q1: Username does not exist/password error/forgot password.**

1. Please double check the username and password, username passwords are case sensitive.
2. Had forgotten password, then click "Forget?" on login interface, follow the prompts to retrieve the password, or reconfigure the password.

### **Q2: Login failed/Login timeout**

1. Please make sure that the phone is properly connected to the network to eliminate network problems.
2. Repeat multiple attempts to eliminate network flashing.

### **Q3: When adding a device, it prompts "The device has been bounding XXXXX@XX.com".**

1. A device can only be added by one account.
2. If you have an account added before, you need to log in the original account to delete, the new account can be added; you can also click "Login" → "Setting" → "Unbind apply" → "Unbind apply" → enter application information → click "Submit apply", wait for the platform to review and unbind.

### **Q4: Cannot search for video**

1. Check if there is recording of the device during that time, playback will not work if there is no recording on cellphone.
2. If it's under normal recording but still playback does not work, check if cable is loose on local storage and somewhere is wrong with TF card, hard disk.
3. Check if the phone time setting and daylight saving time configuration match, and check if the device time and time zone settings are correct.

### **Q5: Preview caton**

1. Select the stream type of the device and switch "HD" to "BD" or "Fluent".
2. Check the upstream bandwidth of the device and the downstream bandwidth of the mobile phone.
3. Reduce the number of mobile phone previews.
4. Check if one device is occupied by multiple mobile phones or other terminals at the same time.

### **Q6: The device is online, the preview is automatically broken, or it is always refreshed**

1. Possible device version is too low, it is recommended to upgrade to the latest version.
2. May cell phone current network is unstable or slow speed, it is recommended for a network environment.

### **Q7: Unable to preview and unable to delete device**

1. Check whether the device is online on the local and mobile APP.
2. Check the device version, if not the latest proposal to upgrade to the latest version.
3. Try using different network types and carriers.

**Q8: Pop-up password input box during preview.**

1. If the account or password is incorrect when binding, the account confirmation box will pop up when connecting with the device and the correct account password can be entered.
2. If the password is modified on the other end (local end, web page end), the account confirmation box will pop up, and the modified account or password can be entered.
