

OzSpy Custom Built Covert Camera Manual

Quick Reference Guide

INTRO

This system uses state of the art Wi-Fi video module to allow streaming of your video of up to 1080p (depending on your phone's capability) and back up recordings of 720p to the on-board memory.

All of our custom built systems are handmade and tested to the highest quality standards.

Please read this setup guide carefully to ensure a simple setup and operation of the unit.

Please note there are other advanced features of these units that can be learned about from our full manual.

THE HARDWARE

The hardware used in this system is delicate high sensitivity electronics so we strongly recommend that you do not touch or handle the internal module.

The unit also has a switch which disables the battery. For permanent connection switch battery off.

For charging and portable use switch battery on.

DOWNLOAD THE APP

The first step in using these units is to download the apps to your phone.

We recommend downloading the following apps as some phones work better with one and some with the other.

p2pCam Viewer

Sysm-P2P IP Cam

Both apps operate the same so we will only show setup for one.

Green circle – Play/Pause

Black circle – SD card slot

Red circle – Power

Blue Circle – Micro USB

CONNECTING TO YOUR MOBILE

Once the unit is on scan for the module with	🗐 🖗 🜵 🦉 🛄 61% 🗺 11:48 am
your phones Wi-Fi. You will see it appears with a long alphanumeric name similar to this	K Wi-Fi 🔽 🔽 🕻

		\$	Ok Cancel	

Disconnect from the Wi-Fi on your phone and connect to your phones "Mobile Data". You are now connected to your camera and you can view a live feed from anywhere using the app on your phone.

N.B Please be sure to reset your camera when changing back to mobile to device connection

ACCESSING RECORDED FILES VIA THE APP (SAME WITH BOTH METHODS)

Whilst in the app you can click on blue arrow to change various settings such as Alarm and System settings.
